## *Electricity at Low Cost?*

*It can be a Reality*

**HAVE YOU GOT A SUITABLE SITE FOR A  
WIND TURBINE?**

*If you have suitable site and would like to install a Mid Range Wind Turbine we can offer you a turnkey package*

*or*

*If you would wish to avoid the investment cost, we will install the Wind Turbine and pay you an annual fee!*

## **In either case we should be talking!**

We provide complete turnkey package including:

- WTN 250kW and 600kW Wind Turbines
- Feasibility Study
- Planning Permission
- Site Work
- Erection and Commissioning of Turbine
- After Sales Service
- 5 years Guarantee with Service and Maintenance Contract

WTN Wind Turbines are of strong robust construction and are designed for trouble-free operation. Fitted with the latest in advanced technology, their turbines will maximize your investment in green energy. There is in-built protection against high wind, and the manufacturer's dedication to superior quality ensures a long operating life for these turbines.

*WTN 250kW Wind Turbine*

## ***We fit the Turbine and you get a rent?***

***With no investment you can still be a winner!..***

If you do not wish to incur the investment cost of a Wind Turbine we can explore the possibility of placing a Turbine on your site and paying you an annual fee.

### ***How do I know my site is suitable?***

We will explore a yearly licence proposal with you if your site has:

- Good elevation with few obstacles, particularly to the South West
- 3 phase with a minimum 200kva transformer (or can be upgraded)
- Adequate road access

***Enjoy some additional income each year!***
